COMPREHENSIVE RESUME: JOSEPH J. RAE II

90/10 Doctrine Command Architecture |

NDAA-Compliant Execution & Governance Systems |

Airline Transport Pilot (Fixed Wing, Rotary Wing, UAS and Cross-Border Operations) |

EXECUTIVE PROFILE

President & CEO of Yellow Dog Defense Consulting (**SDVOSB**), I deliver proprietary 90/10 Doctrine command architecture — **a battle-tested U.S. military command operating system adjusted and optimized for the defense industrial base.**

With 30 years of leadership as a U.S. Army Aviation Warrant Officer, commercial Airline Transport Pilot, and federal contractor, I combine mission-proven command judgment with real-world execution experience. **My focus is replacing coordination paralysis with disciplined execution through the 90/10 Doctrine’s five pillars:**

- **90/10 Model, S-Shop Execution Control, Single Source of Information (SSOI), Disciplined Battle Rhythm, and DOE (Decision • Ownership • Execution).**

These systems deliver **NDAA-compliant governance, audit-ready** traceability, supply chain resilience, and measurable operational tempo for defense prime programs. I install military-grade command architecture that **leadership teams can brief, activate, and implement** — **not generic advice or slides.**

Security Clearance:

- **Active SAPCO Vetting** – Command and Best Cost Pathway (April 2025)
- **Secret Clearance** – Previously held in JPAS (20+ years of continuous military vetting)
